SUMMARY

Entry-level Frontend Developer and React Developer with hands-on experience building and deploying 5 web projects. Skilled in HTML5, CSS3, JavaScript (ES6+), React.js, React Router, Context API, Vite, Git/GitHub, responsive web design, reusable components, React Hooks, client-side routing, localStorage, SEO metadata, and GitHub Pages. Currently pursuing Intermediate in Computer Science and an IT Software Engineering Diploma.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, React Router, Responsive Web Design, UI Development

React: Functional Components, React Hooks, Context API, State Management, Reusable Components, Client-Side Routing

Tools: Git, GitHub, GitHub Pages, Vite, npm, VS Code, Live Server

Web: localStorage, Browser Data Persistence, SEO Metadata, Mobile-Responsive Design, Production Builds

Design & Media: UI Design, Graphic Design, Canva, CapCut, Video Editing

Other: SEO Fundamentals, MS Office, Data Entry, Problem Solving

EXPERIENCE

Frontend Development — Project-Based Experience

- Built and deployed 5 web projects from development through Git version control and production hosting.
- Applied component-based UI architecture, React Hooks, reusable components, Context API, client-side routing, responsive CSS, and browser storage.
- Used Git workflows including repository initialization, commits, remote configuration, branching, and GitHub Pages deployment.
- Created responsive interfaces with attention to usability, visual design, mobile behavior, and performance.

KEY PROJECTS

Outlay — Student Expense Tracker & Budget Planner | React.js, JavaScript, React Router, Context API, CSS3, localStorage, Vite

- Developed and deployed a responsive student budgeting application with expense management, budget tracking, spending analytics, savings goals, and a 50/30/20 calculator.
- Engineered reusable React components, Context API state management, client-side routing, search, authentication flow, localStorage persistence, theme switching, and SEO metadata.

Notes App | Web Application

- Developed and deployed a browser-based notes application with an interactive interface for creating and managing notes.

Live Demo: mahaveer-webdev07.github.io/notes-app/

Modern Todo App | Web Application

- Developed and deployed a modern task-management application focused on interactive frontend UI and usability.
- Implemented a responsive interface for managing and organizing todo items.

Live Demo: mahaveer-webdev07.github.io/modern-todo-app/

Movie Explorer | Web Application

- Developed and deployed a movie-exploration application with an interactive interface for presenting movie-related content.
- Focused on responsive presentation, user-friendly navigation, and frontend interaction.
